First Architectural Exhibition Louisville Chapter American Institute of Architects

1912

BRONZE FOUNTAIN "THE WATER AND THE FLOWERS" ENID YANDELL, SCULPTRESS

Catalogue of the

FIRST EXHIBITION

Louisville Chapter American Institute Of Architects

Held in the Starks Building, Six Hundred and Fifty-Two South Fourth Street, April Twelfth to Twenty-Sixth, Nineteen Hundred and Twelve

BRACKET IN ROOKWOOD FAIENCE REPRODUCED ABOVE

ANNOUNCEMENT

PROGRESS IS WORK IN EACH FIELD OF ENDEAVOR THROUGH A CAREFUL STUDY OF THE BRIGHTEST ACHIEVEMENTS IN THAT FIELD. IN BRINGING TOGETHER THE WORK WHICH MAKES UP THIS EXHIBIT, THE CHAPTER HOPES TO RAISE THE GENERAL STANDARD OF THE ARCHITECTURE OF OUR OWN CITY, BOTH THROUGH THE STIMULUS WHICH THE ARCHITECTS WILL THEMSELVES RECEIVE AND THROUGH THE STIMULUS WHICH THE BUILDING PUBLIC WILL RECEIVE FROM STUDYING THE ACCOMPLISHMENTS OF OTHER CITIES.

P ARTICULARLY IS IT HOPED THAT IN THIS WAY, INTEREST WILL BE AROUSED IN THE DEVELOPMENT OF A WORTHY CITY PLANFOR LOUISVILLE.

THE EXHIBITION WILL BE FREE TO THE PUBLIC FROM SATURDAY, APRIL 13, TO FRIDAY, APRIL 26, INCLUSIVE. HOURS—10 A. M. TO 10 P. M. SUNDAY—2 P. M. TO 6 P. M. EXHIBITS WILL BE DISCHARGED SATURDAY, APRIL 27.

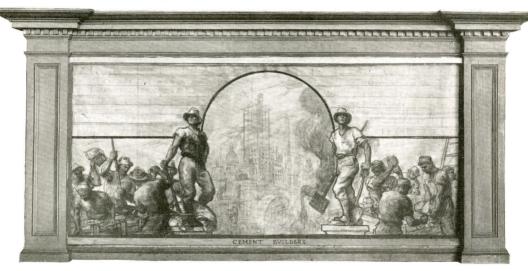

RORHEIM & BROOKS STUDIOS, CLEVELAND.

ACKNOWLEDGMENT

TO THE ADVERTISERS THE CHAPTER DESIRES TO EXPRESS ITS APPRECIATION OF THEIR LIBERAL SUPPORT, WHICH HAS AIDED IN THE MAINTENANCE OF THE EXHIBITION, AND MADE THE PUBLICATION OF THIS CATALOGUE POSSIBLE.

TO THE EXHIBITORS THE CHAPTER RENDERS HEARTY THANKS
FOR THE GENEROUS LOAN OF THEIR WORKS FOR THIS EXHIBITION, AND THEREBY LENDING THEIR AID TO THE PROMOTION AND GROWTH OF ARCHITECTURE.

I T ALSO DESIRES TO EXPRESS ITS APPRECIATION TO MR. ISAAC F. STARKS FOR HIS INTEREST IN THE EXHIBITION BY ALLOWING HIS BUILDING TO BE USED AS A TEMPORARY ART GALLERY, IN WHICH TO HOUSE THE EXHIBITION.

CARTOON FOR MURAL PAINTING—"CEMENT BUILDERS."

THE CITY BEAUTIFUL

Much space in the exhibition is given up to plans and photographs of what is being done in the development of our Cities.

America has taken the lead in civic improvement. The City of Washington planned by Mayor L'enfant, was the pioneer "City Beautiful." It gave L'enfant an opportunity to plan on original lines just as the drafting of a constitution for the infant republic gave an opportunity to frame a new government.

The plan was later disregarded and was being destroyed when late in the nineteenth century the public conscience and pride were touched by appeals of the American Institute of Architects. A commission was appointed and a study of city building was made which resulted in an endorsement of the forgotten L'enfant plan.

 Λ masterpiece of old world planning was the remaking of Paris by Baron Haussmann who had to rebuild an old city.

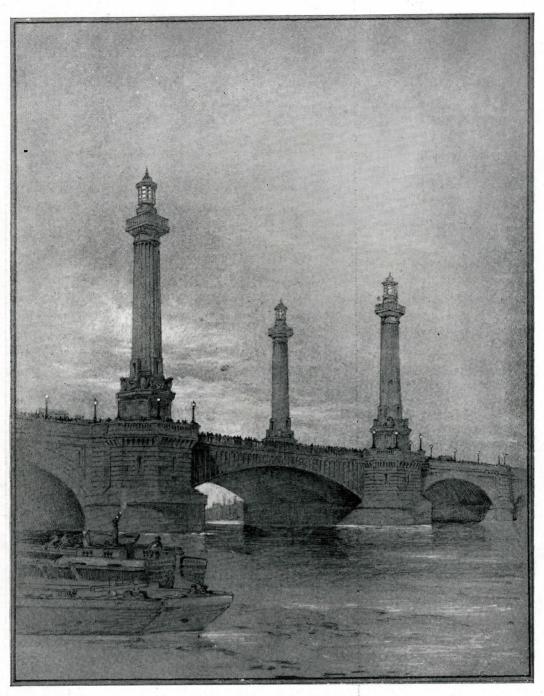

Our problem has much in common with both cities. We have a regular though imperfect plan that is being disregarded. Like L'enfant we have much new territory to develop while like Haussmann we must remove obstructions and make ourselves over to fit new conditions.

Many of the cities of the Americas and Europe are giving their best thought to rational and artistic development and it behooves Louisville to do likewise. One needs but to glance at a latter day map of the city to see what a crazy quilt it has become. How lacking in thoroughfares and means of access from section to section; how we are being hemmed in by large interests; how our water front is being misused; how grade crossings are multiplying; how we worship the fetich of private rights instead of giving way to more important public rights. These and other conditions demand action.

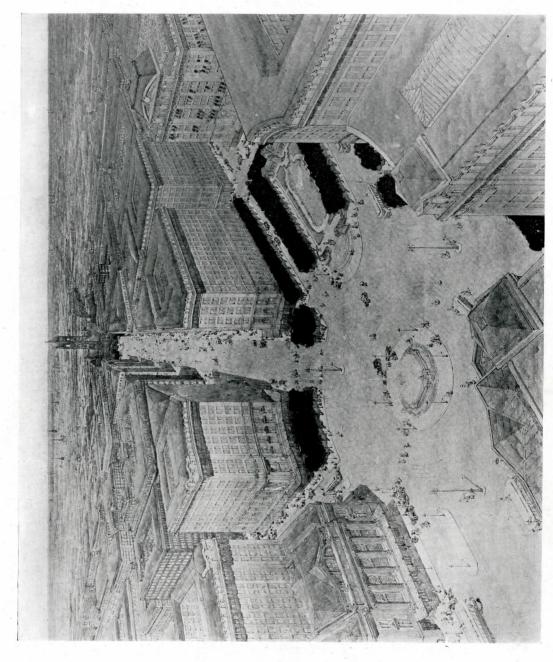

The urgent need is the planning of the greater City before its condition gets worse, for unless there be a change it will never get better. A state law gives the Board of Public Works certain jurisdiction for the supervision of plotting of undeveloped territory. There should also be a law permitting excess condemnation and resale so that changes may be made in the old part of the City.

May we hope that this exhibition will awaken the public conscience to the necessity of this work and that the dawn of a more beautiful Louisville is at hand?

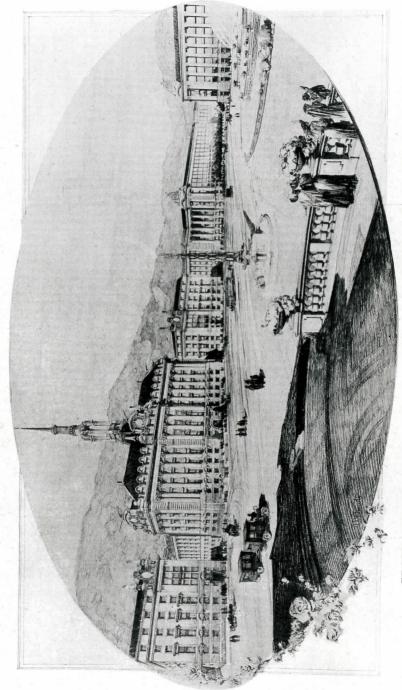

J. C. MURPHY.

Two Automatic Passenger Elevators, Push Button Type

EVERY roof in the above view of the Kansas City business section, with the exception marked X, is a Barrett Specification type of roof.

Such a preponderance is not unusual.

A birds-eye view of any American city, Chicago or New York for instance, will show enormous roof areas laid along the lines of The Barrett Specification, testifying to the almost universal approval which such roofs have won

Barrett Specification Roofs are greatest in durability and their net cost per foot per year of service, is far below that of any other roof known. In other words, Barrett Specification Roofs give more protection per dollar of expenditure than any other kind.

Copy of the Barrett Specification ready for incorporation into building specifications free on request.

Special Note

We advise incorporating in plans the full wording of the Barrett Specification, in order to avoid any misunderstanding.

If any abbreviated form is desired however the following is suggested:

ROOFING—Shall be a Barrett Specification Roof laid as directed in printed Specification, revised August 15, 1911, using the materials specified, and subject to the inspection requirement.

Display Room 311 South Third Street

LOUISVILLE, KENTUCKY

Progressiveness means not being caught standing still while others are moving forward to greater and better things.

You want to be progressive in all work turned out of your office, but are you?

There is one detail we want particularly to call to your attention, that is sometimes overlooked as unimportant and left to incompetent craftsmen to work out as best they can. This detail, is the finishing of walls and ceilings of building interiors.

It is hardly a pleasant thought to you, that any part of a building that you expect to stand as a true record of your ability and taste, may within a year be disfigured, and your whole achievement, as to decorative interior effects, marred.

Prevent this by specifying:-

PEE GEE FLATKOATT

for use on all walls and ceilings of buildings under your supervision. After specifying it, see that it is used and applied according to your specifications.

PEE GEE FLATKOATT is more than a wall finish or covering. Properly applied, it goes into and becomes part of the wall itself.

Write today for our handsome book, "Modern Method of Finishing Walls," which will be gladly sent you with our compliments upon request.

Reg. U. S. Pat. Off.

SAMSON SPOT SASH CORD

is the best cord that we can make after forty years' effort. It is specified by Architects who know that our guarantee of quality is backed by reputation and experience.

Reg. U. S. Pat. Off.

OUR trade-mark on the label is Samson and the Lion in any color. The Spots in any color, as shown in the above cut, are our trade-mark on the cord, used by us for nineteen years, to show, after the label is removed, who guarantees the quality of the cord. During all these years, we have continuously used Blue as one of the colors of Spot, but you recognize either of these marks by the design, not the color.

We are prosecuting suit now against an infringer of this trademark and in the meantime suggest the importance of looking for the label on each hank as well as for the Spot trade-mark on the goods. Substitution of cord with a mark similar to ours has been recently made in Louisville when Spot Cord was called for.

The U. S. Government, for many of its contracts, accepts our lowest grade cord, but we use our trade-mark only on our best. We shall be glad to send you samples and information regarding sizes, weights and durability.

Mrs. John Hay's Garage—Imperial Spanish Red Tile, Cleveland, O. Abram Garfield, Architect.

THE standard color of clay roofing tile is red—that red which is the deep rich red of the clay itself. We furnish such tiles. Now we are offering to the architects for use on high-class work of every description FIREFLASHED TILE in the vitreous ware. These tiles have not been pushed until recently. However, already they have found great favor with the most fastidious architects of the profession who do not care for a roof of a solid red color.

FIREFLASHING gives the tiles a wide variation of shade running from dark brown through the bronze, and reddish brown to pink. The ensemble is remarkably pleasing to the eye and harmonizes admirably with vertical surfaces of so called texture brick. Let us send you samples of these tiles in our Spanish or Interlocking Shingle Patterns (express prepaid) so that you may judge for yourself as to the desirability of using FIREFLASHED TILES on some of your most important work.

NEW Generating Station Kentucky Electric Company, located on the square bounded by Water and Washington, Second and Third Streets. First section with 10,000 kilowatts of turbo-generators installed, completed Spring, 1912. Entire station designed for an ultimate capacity of 75,000 kilowatts in turbo-generators.

The Kentucky Electric Company desires to co-operate with the architects of Louisville in making building plans that will lend themselves to scientific illumination. We are ready to make suggestions on wiring specifications. Call Home 4338 or Main 1481, or better still, come to see us in our new office building, Fourth Street, just south of Chestnut Street. We invite all architects to inspect our new plant on Water Street, facing the river—the most modern generating station in the South.

Security Roofing

Beaver Board

BEAVER BOARD

PURE WOOD FIBRE

Walls and Ceilings

Beaver Board is a Pure Wood Fibre Wall Board which displaces lath and plaster and every other wall and ceiling material and which because of its superior surface for decoration makes unnecessary the use of wall paper for building of every type, new and remodeled.

Architects specify Beaver Board because it is superior to lath and plaster; it presents great advantages as an artistic medium, is more durable, more easily and quickly applied, is sanitary and adaptable to every wall and ceiling requirement.

Ask for Sample

Security Wide-Weld Roofing

Is composed of Pure Mineral Asphalt and Wool Felt

The Cement-Welded Joint. This patented Wide-Weld of Security Wide-Weld Roofing means that every sheet is cemented to the one lying next above it on the roof, so they practically become one, resulting in a continuous, one-piece roof with no nail heads exposed.

An Insurance Policy on Your Heating System

THERE are many reasons why you should consult us before you decide on your heating system. Here are five:

1. AGE AND GROWTH

Established 1888—Camden factory now covers more than 50,000 square feet of floor space.

2. EXPERIENCE

More than 5,000 Webster Vacuum System installations in all types of buildings.

3. ORGANIZATION FACILITIES

Branch offices in twenty-three principal cities to render co-operative service.

4. EFFICIENCY OF PRODUCTS

Every Webster Specialty tried and tested.

5. RESULTS

Results from Webster Vacuum and Modulation systems are guaranteed along certain lines, thus making each contract practically an insurance policy on the heating system.

Contractors for Anything and Everything Electrical

We make a specialty of laying out plans and specifications for Light and Power work to fit any conditions. We have had 25 years of PRACTICAL experience in the business, and can refer to thousands of satisfied customers.

The Architect of His Own Fortune

THE planning of a modern factory, of any up-to-date public building, of a comfortable home, modest or palatial, must include ELECTRICITY.

¶ For LIGHT: Illumination is a science in itself. Most Architects are experts and are keenly alive to modern requirements. Our experts' service is yours at any time and without cost.

Electric Power's Triumph

¶ For POWER: We have equipped many local industrial plants with electric drive. We solicit your interest in the modern method and point to definite and satisfactory results.

N a recent test made by the UNITED STATES GOVERN-MENT it was shown that REGAL Sash Cord would lift a twenty-pound weight 233,000 times at the rate of 50 times per minute before wearing. In a test of the best Chain Sash Cord made by a leading technical school it was shown that the greatest number of times the chain would lift an equal weight without breaking was 76,000 times, proving conclusively that REGAL Sash Cord will outwear the best chain more than three times. If further proof is necessary of this fact, we are in a position to, and will gladly furnish it on application.

REGAL Cord is perfect in construction. IT IS THE ONLY CORD NOW MANUFACTURED ON THE LATE IM-

PROVED BRAIDER, and on account of its perfection of finish makes a window act very smoothly and easily.

REGAL Cord costs just one-fifth as much as a good chain cord.

It is far superior to any other brand or make of cord now offered to the architects for specification, and its initial cost is less than that of either of the two other well known brands. WE SOLICIT YOUR INQUIRIES FOR SAMPLES AND TESTS and ask you to specify it.
